DETAILED ACTION

Allowable Subject Matter

1. Claims 9-18 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose or suggest a motivation for the steps of measuring the nitrate content and redox potential, and subjecting the water to anoxic treatment until measured nitrate is less than or equal to a low nitrate set value or exceeds the low value in combination with the other method steps. The invention is considered to be a non-obvious improvement on the method of WO 00/37369 A, which discloses aerobic and anoxic cycle time control based on ORP measurements, but fails to teach setting high and low nitrate set values for comparison with the measured nitrate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional references listed on the attached PTO-892 form disclose controlled biological water treatment methods.
